Content & Audience

Did your peers clearly understand your site's purpose and target audience?

- Yes they were able to easily understand the app was for people that want help finding/making meals that cater to everyone in a group

What suggestions did they make to improve your site's content or messaging?

- There were no suggestions for the content/messaging, they found it very clear and understandable

Design & User Experience

How did your peers respond to your site's design (layout, color, typography, or organization)?

- They really enjoyed the design of the website, most specifically the layout and color design. They thought the colors really complimented each other and that the layout of certain pages was very eye catching and engaging.

Did they find the design effective in communicating your message and engaging users?

- They thought the alternating colors and text/image positions on the about page were really engaging. They did mention I should add in image to the bottom of the home page though because there is a lot of empty space

Functionality & Performance

What issues did your peers identify with features or interactivity on your site?

- One of the links in my header is messed up

Did they note any pages or elements that loaded slowly or inconsistently across devices or browsers?

- The banner image on the about page loads slowly sometimes and one of them mentioned my screen doesn't adjust too well for mobile devices

Accessibility & Usability

What feedback did you receive about accessibility (e.g., alt text, color contrast, keyboard navigation)?

- Everything is pretty accessible but I need to add some labels to my forms, change the resolution of an image, and add a h1 element to certain pages

What can you improve to make your site more inclusive and user-friendly?

- Add some labels to the forms, change the resolution of an image, and add h1 elements

Action Plan

What did your peers like most about your site?

- The overall theme and layout of the site

What two improvements will you make based on their feedback, and how will you implement them?

- Definitely work on my accessibility by: changing image resolution, adding h1 elements, adding labels, and making mobile use a little better
- I will also work on adding an image to the homepage to fill the space
